

Created using SoccerTutor.com Tactics Manager

Procedure: Player A begins play by dribbling towards the line of players on the opposite side. Player 1 jumps out to defend, and the second player in line — Player 2 — looks to combine with Player A to beat the defender with a 2 v 1 combination. Upon completion of the combination, the ball is passed up to Player 3, who begins the next attack in the opposite direction. Player C will combine with Player 3, and Player B will become the defender.

Coaching Points:

- 1 Player 2 must read the defender's run and set up on his blind side.
- 2 Look for other combinations when the defender takes away the wall pass.
- 3 Player 2 must jump out to create a passing angle and not hide behind the defender.

Progressions/Regressions:

Progression 1 – Add another line to the drill and play 3 v 2.
